

LINKS to **AWESOME** RESOURCES

[Jeff Evans Science Magic](#)

Jeff Evans will put on an assembly for the whole school on Friday, March 29th. If you enjoyed it and want to learn more about fun experiments and demonstrations students can do, check out his website.

[Steve Spangler Science](#)

This is a wonderful site where you can see a collection of science experiments organized by category, with detailed information and illustrated directions.

[Design Squad](#)

This site is a highly engaging and effective way for kids to develop complex and original solutions to engineering and design problems.

[Invention Convention](#)

A great site for inventors! You can find inspiring videos and maybe even decide to enter.

[Science Buddies](#)

A helpful resource for those seeking science project support and success.

[Science Fair Central](#)

Home Depot and Discovery Education partner on this website to present project ideas, project steps and presentation ideas.

[Curiosity Machine](#)

Kids build, share, receive pro feedback with this awesome engineering site.

[Exploratorium](#)

Science experiments and activities abound in this comprehensive resource.

[World Book Kids](#)
