

Name _____

CSS webpage check off sheet <65 points>

After completing the CSS online tutorials, you must:

1. either create a new HTML site or remove all formatting from your former site to complete this project.
2. Create a CSS file that will run the formatting for the website.
3. Link the CSS to the HTML, make sure it runs and get your site checked off.

Requirements of CSS: (you may add more if you like)	Credit Earned
Stylesheet is linked to two or more HTML pages – 5pts	
Link states: link – 5pts hover – 5pts active – 5pts visited – 5pts	
Background of site, div, or table changes color or is an image – 5pts	
Create three different classes or ids that effect text. (you can have a combination of classes and/or ids as long as there are three) – 15pts	
Put some type of border around at least one of the text ids/classes. ie: solid, dotted, etc – 5pts	
Make a drop down button and add it to the HTML nav bar. You need to give it three drop down options. – 15pts
