

My Math Problem Solving Strategy

The four-step strategy:

1. **Understand**

What facts do you know?

What do you need to find out?

2. **Plan**

What strategy should you try?

3. **Solve**

Use strategies and models to solve the problem.

4. **Check**

Does the solution make sense?

Can you check it for accuracy?

Suggested Problem Solving Strategies:

- Act it out or use objects to model
- Guess and check
- Develop a picture or diagram to help model
- Make a table
