Better Data. Better Decisions. Better Schools.

Introduction

EES Staff Survey Research Framework

The Center for Educational Effectiveness brings together leading research to create the Educational Effectiveness Survey™ (EES)—a formative and diagnostic tool designed to stimulate and inform conversations for improvement within your organization. The research framework includes:

- Effective organizations
- Organizational trust
- Culturally responsive teaching
- District support for improvement
- Attributes of effective instructional practice

This report contains results from the survey you recently administered.

Survey Question Structure

Staff are asked to identify their position when they begin the survey. Instructional staff are shown all questions in the survey while non-instructional staff are shown a subset that omits instructional practice questions. This allows for deeper analysis of the survey data.

Readiness for Change

This is the starting point for interpreting your EES Staff data. CEE’s research into staff survey responses has shown these items or attributes to be foundational to organizational change. This section, with your unique charted data, is the first section in the report.

9 Characteristics of High-Performing Schools

While there is no single solution for all schools, research on effective schools identified common characteristics of high-performing schools. Successful schools engaged in improvement activities focus on these characteristics to create and improve the system(s) that ultimately increase student learning and achievement.

Readiness for Change

The charts below are data about your school staff, who must define, embrace, implement, and sustain change. If your staff believes there is a weakness in the problem-solving ability or in the ability to resolve conflict within this building, or does not see the urgency to improve, you must address those issues to successfully navigate and sustain change. The data contained within the EES will allow conversations about those and other issues to begin by using “the staff voice.”

You will find these data and the rest of the “readiness for change” data in the following report section.
