

One-paragraph (minimum) report required, and may include research on past designs and predictions for the future.

6. Research Projects

If your question requires using the library, internet, interviewing, etc. you will prepare a complete and well-organized report, including a bibliography. You will create a display to show your findings. Examples of research projects:

How does Bainbridge Island manage storm water runoff?

How are decisions made in loading and unloading the ferry?

How is magnetism used on different modes of transportation?

Where would the North Pole be if the arctic ice cap is melted?

*Please include your full name, grade, and date on your project!
